what they hear". When they see an English word, they expect its letters to tell them the pronunciation and recognize its meaning. Thus English speakers find Chinese characters to be too complicated and confusing because they cannot pronounce them easily. Without a phonetic system, they have to find the pronunciations through pinyin and then find the meaning. Therefore, English speakers think they need extra time to learn to connect the graphic shapes of Chinese characters with their pronunciation. So learning the Chinese language can seem like learning two different languages: one for listening and speaking, and the other for reading and writing. However, if you can master the methods of learning Chinese characters in this book, you will get twice the results with half the effort! "Easy Learning: Chinese Characters" can make your

of the characters in this book may need to be memorized mechanically but even they are provided with vivid pictures to help remember them. All of the characters, words and phrases are provided with detailed pronunciation in pinyin. So all the lessons taught in this book should be easily mastered by new learners. All languages are connected. Chinese is similar to English in numerous ways. Pictophonetic characters make up over 90% of all Chinese characters. By mastering the rules of pictophonetic characters, one can read most of the characters. Chinese radicals (the part of a Chinese character which represents its meaning) are like English monograms. Monograms represent the meaning of words, for example, words containing "astro" are mostly related to stars. "Easy Learning: Chinese Characters" focuses on teaching you to master basic character forms including

"The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. Remembering Simplified Hanzi covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage." "Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.
