century when Ottoman reforms led to gradual state modernization and increasing integration in the World Economy. British control after World War I was one of the determining factors in the establishment of the current borders of the country and the nature of its subsequent national identity. The other important factor was the highly heterogeneous nature of Iraqi society being divided along tribal, ethnic, religious, and sectarian lines. This book focuses on the interaction between the old and the new, or between continuity and change, as it is manifested in the nature of social development, nation-building, the state and the political opposition. Cities, scripts, literature, the rule of law – all were born in Iraq. That so many see this ancient land as nothing more than a violent backwater steeped in chaos is a travesty. This is the place where, for the first 5,000 years of human history, all innovations of worth emerged. It was the cradle of civilization. In this unrivalled study, John Robertson details the greatness and grandeur of Iraq's achievements, the brutality and magnificence of its ancient empires and its extraordinary contributions to the world. Uses United Nations reports, Iraqi government records, and interviews with Iraqi educators, writers, and ordinary citizens to present a history of modern Iraq, from the construction of the modern state in 1920 through today.

A Time magazine foreign correspondent shares "moving stories from the Iraqis who lived through the nightmare" in this oral history of the Iraq War (Kikrus). Journalist Mark Kukis presents a history of the U.S. invasion and occupation of Iraq as told by Iraqis who live through it. Beginning in 2003, this intimate narrative includes the accounts of civilians, politicians, former dissidents, insurgents, and militiamen. The men and women sharing their firsthand experiences range from onetime Prime Minister Ayad Allawi to resistance fighters speaking on the condition of anonymity. Divided into five parts, these interviews recount the 2003 invasion; the two years of chaos that followed; the start of a new order in 2006; the rise of sectarian violence; and the effort to reconstruct their society since 2008. In each section, interviews grouped into themes, with brief

In March 2003, the United States and Great Britain invaded Iraq to put an end to the regime of Saddam Hussein. The war was launched without a United Nations mandate and was based on the erroneous claim that Iraq had retained weapons of mass destruction. France, under President Jacques Chirac and Foreign Minister Dominique de Villepin, spectacularly opposed the United States and British invasion, leading a global coalition against the war that also included Germany and Russia. The diplomatic crisis leading up to the war shook both French and American perceptions of each other and revealed cracks in the transatlantic relationship that had been building since the end of the Cold War. Based on exclusive French archival sources and numerous interviews with former officials in both

France and the United States, A History of the Iraq Crisis retraces the international exchange that culminated in the 2003 Iraq conflict. It shows how and why the Iraq crisis led to a confrontation between two longtime allies unprecedented since the time of Charles de Gaulle, and it exposes the deep and ongoing divisions within Europe, the Atlantic alliance, and the international community as a whole. The Franco-American narrative offers a unique prism through which the American road to war can be better understood.

The history of Iraq is made up of successive and radical breaks (coup d'état, changes of regime, military invasions), the chronological markers of which are easy to identify. Although researchers cannot ignore these disruptions, it is also necessary to establish a link between the moments when the breaks occur and the longer term, in order to shed light on the period under study. Combining different disciplines (history, sociology, political science and anthropology), the book seeks to advance some milestones that will allow for a renewed perspective on Iraqi 20th century history and propose a narrative that fits into new paradigms. Finally, the book tackles different periods (monarchy, republic, Ba'thist, etc.) with an interest in diverse spheres of the Iraqi society (arts, politics, religious, tribal, etc.).
