Nonnus of Panopolis (fifth century CE) composed two poems once thought to be incompatible: the Dionysiaca, a mythological long epic with a marked interest in astrology, the occult, the paradox and not least the beauty of the female body, and a pious and sublime Paraphrase of the Gospel of St John. Little is known about the man, to whom sundry identities have been attached. The longer work has been misrepresented as a degenerate poem or as a mythological handbook. The Christian poem has been neglected or undervalued. Yet, Nonnus accomplished an ambitious plan, in two parts, aiming at representing world-history. This volume consists mainly of the Proceedings of the First International Conference on Nonnus held in Rethymno, Crete in May 2011. With twentyfour essays, an international team of specialists place Nonnus firmly in his time's context. After an authoritative Introduction by Pierre Chuvin, chapters on Nonnus and the literary past, the visual arts, Late Antiqua paideia, Christianity and his immediate and long-range afterlife (to modern times) offer a wide-ranging and innovative insight into the man and his world. The volume moves on beyond stereotypes to inaugurate a new era of research for Nonnus and Late Antique poetics on the whole.

This major addition to Blackwell's Companions to the Ancient World series covers all aspects of religion in the ancient Greek world from the archaic, through the classical and into the Hellenistic period. Written by a panel of international experts Focuses on religious life as it was experienced by Greek men and women at different times and in different places Features major sections on local religious systems, sacred spaces and ritual, and the divine

This book traverses the ancient world's three great centers of cultural exchange—Babylonian Nineveh, Egyptian Memphis, and Iranian Persepolis—to situate classical Greece at the Western margin of a more comprehensive Near Eastern-Aegean cultural community that emerged in the Bronze Age and expanded westward in the first millennium B.C.

Annotation A study of the phenomenon of prophecy as documented in ancient Near Eastern texts and the Hebrew Bible as well as Greek sources, from the twenty-first century BCE to the second century CE.

Kimberly B. Stratton investigates the cultural and ideological motivations behind early imaginings of the magician, the sorceress, and the witch in the ancient world. Accusations of magic could carry the death penalty or, at the very least, marginalize the person or group they targeted. But Stratton moves beyond the popular view of these accusations as mere slander. In her view, representations and accusations of sorcery mirror the complex struggle of ancient societies to define authority, legitimacy, and Otherness. Stratton argues that the concept "magic" first emerged as a discourse in ancient Athens where it operated part and parcel of the struggle to define Greek identity in opposition to the uncivilized "barbarian" following the Persian Wars. The idea of magic then spread throughout the Hellenized world and Rome, reflecting and adapting to political forces, values, and social concerns in each society. Stratton considers the portrayal of witches and magicians in the literature of four related periods and cultures: classical Athens, early imperial Rome, pre-Constantine Christianity, and rabbinic Judaism. She compares patterns in their representations of magic and analyzes the relationship between these stereotypes and the social factors that shaped them. Stratton's comparative approach illuminates the degree to which magic was (and still is) a cultural construct that depended upon and reflected particular social contexts. Unlike most previous studies of magic, which treated the classical world separately from antique Judaism, Naming the Witch highlights the degree to which these ancient cultures shared ideas about power and legitimate authority, even while constructing and deploying those ideas in different ways. The book also interrogates the common association of women with magic, denaturalizing the gendered stereotype in the process. Drawing on Michel Foucault's notion of discourse as well as the work of other contemporary theorists, such as Homi K. Bhabha and Bruce Lincoln, Stratton's bewitching study presents a more nuanced, ideologically sensitive approach to understanding the witch in Western history.

Using archaeological, epigraphic, and literary sources; and incorporating current scholarly theories, this volume will serve as an excellent companion to any introduction to Greek mythology, showing a side of the Greek gods to which most students are rarely exposed. Detailed enough to be used as a quick reference tool or text, and providing a readable account focusing on the oldest, most widespread, and most interesting religious practices of the ancient Greek world in the Archaic and Classical periods, Ancient Greek Cults surveys ancient Greek religion through the cults of its gods and goddesses, heroes and heroines. Jennifer Larson conveniently summarizes a vast amount of material in many languages, normally inaccessible to undergrad students, and explores, in detail, the variety of cults celebrated by the Greeks, how these cults differed geographically, and how each deity was conceptualized in local cult titles and rituals. Including an introductory chapter on sources and methods, and suggestions for further reading this book will allow readers to gain a fresh perspective on Greek religion.

Presents a landmark study combining key specialists around the region with well-established international scholars, from a wide range of disciplines.

This ambitious book probes our biological past to discover the kinds of lives that human beings have imagined were worth living. Bellah's theory goes deep into cultural and genetic evolution to identify a range of capacities (communal dancing, storytelling, theorizing) whose emergence made religious development possible in the first millennium BCE.

"A brilliant, up-to-date account of all of ancient Greek history (the Archaic, Classical, and Hellenistic periods), suitable for history buffs and university students, enlivened by a strong thesis about the disunity of the Greeks, their underlying cultural unity, and their eventual political unification"--

A major new history of classical Greece—how it rose, how it fell, and what we can learn from it Lord Byron described Greece as great, fallen, and immortal, a characterization more apt than he knew. Through most of its long history, Greece was poor. But in the classical era, Greece was densely populated and highly urbanized. Many surprisingly healthy Greeks lived in remarkably big houses and worked for high wages at specialized occupations. Middle-class spending drove sustained economic growth and classical wealth produced a stunning cultural efflorescence lasting hundreds of years. Why did Greece reach such heights in the classical period—and why only then? And how, after "the Greek miracle" had endured for centuries, did the Macedonians defeat the Greeks, seemingly bringing an end to their glory? Drawing on a massive body of newly available data and employing novel approaches to evidence, Josiah Ober offers a major new history of classical Greece and an unprecedented account of its rise and fall. Ober argues that Greece's rise was no miracle but rather the result of political breakthroughs and economic development. The extraordinary emergence of citizen-centered city-states transformed Greece into a society that defeated the mighty Persian Empire. Yet Philip and Alexander of Macedonia were able to beat the Greeks in the Battle of Chaeronea in 338 BCE, a victory made possible by the Macedonians' appropriation of Greek innovations. After Alexander's death, battle-hardened warlords fought ruthlessly over the remnants of his empire. But Greek cities remained populous and wealthy, their economy and culture surviving to be passed on to the Romans—and to us. A compelling narrative filled with uncanny modern parallels, this is a book for anyone interested in how great civilizations are born and die. This book is based on evidence available on a new interactive website. To learn more, please visit: <http://polis.stanford.edu/>.
