Back To a Future for Mankind: BioGeometry: Ibrahim Karim ...

Thirty-five years ago, a teenager went back in time, and as a result, had to make sure his parents met and fell in love. That's the plot of 1985's "Back to the Future," which celebrates its 35th anniversary in 2020. The film currently can be seen on Netflix. It's now been longer since 1985 than the 30 years Marty McFly traveled back to 1955.

This first-ever published collection of writings by Dr. Ibrahim Karim reflects the holistic essence of his worldview. Dr Karim is the founder of the Science of BioGeometry in the early 1970s. BioGeometry is the science that uses shapes, colors, motion and sound to induce harmony into the subtle energy qualities of the environment. At the core of this harmony is a subtle energy quality found in the transcendental centers of the forming process of nature and is the main quality in sacred power spots of humanity that give a spiritual dimension to the timeless monuments erected since the dawn of humanity. With his experience as an architect and a scientist Dr. Karim has synergized aspects of Pythagorean Harmonics, Subtle energy sciences, Radiesthesia, Geobiology, Building Biology, Sacred Architecture & modern wave theories to produce a new Physics of Quality from which the science of BioGeometry emerged.

*BioGeometry bridges science and spirituality to produce a natural harmony into the environment. *BioGeometry provides a viable solution in transforming the quality of the effect that electromagnetic radiation has on living systems. Successful projects in Switzerland in collaboration & acknowledgment of Swiss authorities prove its efficiency to take our modern science into the future.

This compelling study places 'Back to the Future' in the context of Reaganite America, discusses Robert Zemeckis's film-making technique and its relationship to the 'New New Hollywood', explores the film's attitudes to teen culture of the 1950s and 1980s and its representation of science, atomic power and time travel.

After embracing the theology of Dispensationalism for thirty-three years, doubts grew in the author's mind concerning the issues raised by eschatological questions. While pastoring he avoided the subject. But one day he was asked questions on prophecy that he simply could no longer answer with commitment or conviction. It was time to find some real answers. This book began as Sunday school lessons to provide those real answers. Long after the Sunday school lessons ended, the study and the writing continued. Not satisfied with Sunday school answers; Dr. Bass wanted something definitive for his own benefit and the benefit of others. This work is an effort to provide that substance, that body of learning beyond the Sunday school class for those that demand more, much more. Feeling that much of what was out there on the subject was sorely wanting, Dr. Bass envisaged another work from the loyal opposition of the prevailing opinion, something written from a deep conviction in the sufficiency and

trustworthiness of Scripture, yet something far different from the usual offerings. This book is the result of the author's quest.

For two decades, paleoecologist David Burney and his wife, Lida Pigott Burney, have led an excavation of Makauwahi Cave on the island of Kaua'i, uncovering the fascinating variety of plants and animals that have inhabited Hawaii throughout its history. From the unique perspective of paleoecology—the study of ancient environments—Burney has focused his investigations on the dramatic ecological changes that began after the arrival of humans one thousand years ago, detailing not only the environmental degradation they introduced but also asking how and why this destruction occurred and, most significantly, what might happen in the future. Using Kaua'i as an ecological prototype and drawing on the author's adventures in Madagascar, Mauritius, and other exciting locales, Burney examines highly pertinent theories about current threats to endangered species, restoration of ecosystems, and how people can work together to repair environmental damage elsewhere on the planet. Intriguing illustrations, including a reconstruction of the ancient ecological landscape of Kaua'i by the artist Julian Hume, offer an engaging window into the ecological marvels of another time. A fascinating adventure story of one man's life in paleoecology, *Back to the Future in the Caves of Kaua'i* reveals the excitement—and

Based on over 45 years of research, BioGeometry Signatures are linear diagrams that help balance the subtle energy of body organs. The organ subtle energy patterns are accessed through BioGeometry Signatures placed externally in the body's energy fields to create a connection through Resonance of Shape. "This is a book that will change the way you think about your body and your health. It shows that we are not separate from the shapes, angles and proportions that surround us all the time, and that these shapes create energetic patterns that can introduce equilibrium and harmony into our own biological makeup. This is a modern science of energy balancing that provides the key to the hidden ancient knowledge of great civilizations. With BioGeometry, Dr. Ibrahim Karim has demonstrated how powerful simple shapes can be in altering the functioning of our physical, mental, and spiritual worlds. This has been frequently demonstrated in architectural and design projects, environmental balancing solutions including the mitigation of the effects of electro-pollution and geopathic stress, in health and wellness projects, and in the efforts of individuals in their personal spiritual development. In this book on BioGeometry Signatures, once again you see how powerful
