BEDFORD 1973 RANGE PROMOTIONAL FILM Bedford Tm 500 Engine

Through its lifespan, it was available with a Bedford 500 turbo engine also known as the 8.2 Blue, a Detroit Diesel two-stroke V6 and V8 or a Cummins L10, coupled to either a Fuller or Spicer transmission, and a SOMA rear axle (dropped after the 1982 facelift). The Detroit engine was not a successful choice in the UK. Because of its high-revving characteristics, it proved unpopular with drivers, who were used to slow revving, long stroke, UK diesels.

The Bedford TM 4-4 and TM 6-6 trucks are basically similar, the TM 4-4 being a 4x4, 8 tone vehicle and the TM 6-6 being a 6x6, 14 tone design (maximum load 16 tons). They share many components in common, such as the utilitarian forward control cab and engine, while many design details, such as the cargo area loading heights, are identical on both vehicles.

A visual guide to the history of tanks, Tank tells the full history of tanks through stunning photography and informative text. From the early Mark Is of World War I to the T-34 of World War II to the cutting-edge M1 Abrams of today, Tank showcases the most famous (or infamous) armored fighting vehicles in history. Packed full of tanks, armored vehicles, personnel carriers, and anti-tank weaponry, Tank combines comprehensive photographic spreads with in-depth histories of key manufacturers and specially commissioned visual tours of the most iconic examples of their kind. The featured vehicles are placed in their wider context, along with with tactical and technological improvements, and the impact of the tank on the evolution of battlefield and military strategy. Tank charts the evolution of the tank over the past century, covering over 450 tanks and military vehicles from all over the world. Look through the history of tanks and explore the form and function of a weapon that changed history. Learn the different vehicles' weight, size, country of origin, and time of use through in-depth profiles. An essential visual history, Tank provides a complete and exciting overview to the iconic vehicles that changed history.

The untold story of Britain's oldest car makerMany previously unpublished images from the vaults of VauxhallA view from the inside that has been untold until nowOf interest to the motorcar historian and modellers Vauxhall has been making cars in Britain for longer than anyone else. The first Vauxhall car left a cramped Thames-side works in 1903. Moving to Luton in 1905, Vauxhall became famous as a maker of sporting and luxury cars. Bought by the American giant General Motors, the company entered the era of mass production and, with the addition of Bedford trucks and vans, became one of the top five UK producers. After the Second World War, Vauxhall became the household name it is today with models such as Viva, Astra, Cresta, Victor, Nova, Cavalier and Vivaro. The journey from the Thames to today's plants at Ellesmere Port and Luton is full of twists, turns, dramas and triumphs, and continues with the announcement of the sale of General Motors European operations to the PSA Groupe. The author worked at Vauxhall for 38 years, from apprentice to boardroom. He has told the Vauxhall story with the benefit of years of experience and a lifelong passion for the marque.
