Fintech is a global phenomenon that plays out in local economic, political and regulatory contexts, and this dynamic interplay between global trends and local circumstances has created a complex and fast-changing landscape. Diverse stakeholders (most obviously incumbent financial service providers, tech start-ups and regulators) all pursue a competitive edge against a background of profound uncertainty about the future direction and possible effects of multiple emerging technologies. Compounding these difficulties are uncertainties surrounding regulatory responses. Policymakers often struggle to identify appropriate regulatory responses and increasingly turn to policy experimentation. Such issues add to the challenges for the various actors operating in the Fintech space. This

The digital transition of our economies is now entering a phase of broad and deep societal impact. While there is one overall transition, there are many different sectoral transformations, from health and legal services to tax reports and taxi rides, as well as a rising number of transversal trends and policy issues, from widespread precarious employment and privacy concerns to market monopoly and cybercrime. They all are fertile ground for researchers, as established laws and regulations, organizational structures, business models, value networks and workflow routines are

A 13-point manifesto for a new financial services marketing model Anthony Thomson knows a thing or two about new and disruptive financial services, having co-founded and chaired first the ground-breaking Metro Bank and then the purely digital, app-based Atom Bank. And as a financial services marketing specialist for over 30 years, Lucian Camp has helped develop more new and innovative financial services propositions than anyone. Now they 've put their heads together to write No Small Change, a passionate, opinionated and practical manifesto arguing that the fast-changing financial services world urgently needs to rethink the whole of its approach to marketing. Most of all, they propose that an increasingly digital, fintech-driven industry needs not just more marketing, but also better marketing to

make sure it 's successfully identifying consumers ' real needs, and finding powerful and successful ways to engage with them. After detailing the forces of change that demand a new approach, the book then examines in 13 chapters what the key components of that new approach should look like. It takes a broad and multi-faceted perspective, exploring areas as diverse as the crisis of consumer trust, the ever-growing power of Big Data, the importance of leadership and corporate culture and the rapid advance in thinking based on Behavioural Economics. In developing these themes, the authors don ' t pull their punches. The book is fiercely critical of some of the industry ' s long-established marketing habits, providing compelling reasons why it ' s time to abandon the practices that have given it a bad name.

Marketers will applaud, but the book is also intended for a broader audience. Thomson and Camp challenge senior management in financial firms to appreciate the real value that marketers can bring to shaping the business agenda at the highest level, and not just to label marketing with that tired old phrase “ the colouring-in department. ” Rich in anecdotes, comments from leading industry figures, personal experiences on the part of both authors and findings from original research, No Small Change is an entertaining and rewarding read – and, at this point in the development of financial services, a timely and important one.

The Great Financial Crisis of 2007-2010 has had a major impact on large cross-border banks, which are widely blamed for the start and severity of the crisis. As a result, much public policy, both in the United States and elsewhere, has been directed at making these banks safer and less influential by reducing their size and permissible powers through increased government regulation. At the Federal Reserve Bank of Chicago's 18th annual International Banking Conference, held in November 2015, the status of these large cross-border banks was critically evaluated. In collaboration with the World Bank, the conference held discussions on the current regulatory landscape for large
