and fears. Cat Body Language looks at all the postures cats are likely to adopt in and around the home, both with other cats and with their owners. Using the psychology of cat behaviour, it explains how a cat is likely to react in stressful situations, such as during a visit to the vet, when it is ill, and before or after a fight. All the most common behavioural traits of cats are examined in detail, from raking the dirt in the backyard and kneading their paws while being stroked to chattering their teeth at flying birds and meowing when a can of food is opened. Too often as parents, we simply don't think about teaching safety issues concerning dogs, until there's a situation happening. That is not the time for teaching, but for action. Prevention can go a long way. Even if you don't own a dog, every child should be taught, as they will come into contact with dogs in other situations. This book is one an adult can use for both a child who may be fearful of dogs, and a child who is too bold with dogs, and should learn more respect. Parents know the stages of their kids as well as the child's temperament and history they've had with dogs. All these factors come into play when teaching about safety and dogs. This is a subject that all too often doesn't get taught at all. The book closes with some silly photos to end on a lighter

A fully illustrated practical "instruction manual" for dog owners to help them understand dog behavior by means of characterful bespoke drawings. Dogs communicate with so much more than barks and tail wags, and many visual signals can tell us how they are feeling about any situation. Misreading dog body language makes life challenging for dogs and their humans. It can even lead to bites and fights if what a dog is saying is dismissed or ignored. This little book of drawings is an introduction to seeing the small and large shifts in how dogs carry themselves. The more we notice and understand, the better chances we have of helping our best friends feel safe and happy!
