This book explores the city's *raison d'être*, functions and forms, its achievements and problems, from fortifications to sewers, factories to markets, theatres and bars. John Reader's history of Africa was praised by the Sunday Times for 'masterfully [ranging] across time and space, making extraordinary and thought-provoking connections'. His new book, an exploration of the nature of the city and of city- life will draw on the same skills, both as a researcher and writer. From the ruins of the earliest cities to the present, Reader will explore how cities develop and thrive, how they can decline and die, how they remake themselves. He will investigate their parasitic relationship with the country around them, the webs of trade and immigration they inhabit, how they feed and water themselves and dispose of

their wastes, focusing as much on Baron Haussman's creation of the Paris sewers as of his plans for the grands boulevards, on prostitution as on government, on human lives as on architecture, on markets as on cathedrals, in a sweeping exploration of what the city is and has been, fit to stand alongside Lewis Mumford's 1962 classic THE CITY IN HISTORY.

The new edition of The Story of Ancient Rome is now in color and has been revised and expanded to take account of recent discoveries and contemporary issues of scholarly debate. The history of Rome began in the eighth century B.C. when several clusters of villages on the hills overlooking the Tiber River merged into a single city and established a common meeting place known as the forum. A more colorful account describes how the city of Rome was founded by legendary twin brothers, Romulus and Remus, who were raised by a she-wolf. The Story of Ancient Rome chronicles in colorful detail both the documented history and the legends of the city that arose from humble beginnings to become the center of an immense empire encompassing two million square miles and spanning three continents.

Long and long ago, it is said, Nimitur, King of Alba, was robbed of his crown, and thrust from his kingdom by his younger brother, Amulius. Now Nimitur had one daughter. Amulius, when he had made himself king, forced this maiden to become a "Vestal", - that is to say, a high priestess, and, as a Vestal, she had to make a vow never to marry. This Amulius did in order to reign in safety, for he was afraid if the daughter of Nimitur were to marry that her children might some day try to win back their rightful inheritance. However, his cunning plan failed: the maiden was loved by the god Mars; she broke her vow, and Romulus and Remus were born.
