Reading Made Easy with Blend Phonics for First Grade was first published in 1980 by Hazel Logan Loring, who had taught it for many years in her first grade classes. It features instruction in directional guidance, which helps prevent reversals in reading. It has also proven very valuable in helping older students with reading problems. The accompanying Blend Phonics Fluency Drills were written by Mr. Donald L. Potter to help students to develop high

levels of decoding fluency (accuracy and speed). The Fluency Drills have proven particularly valuable in helping struggling readers to overcome the whole-word guessing habit and improve reading efficiency.

This instructor's manual was designed to help graduates of the California Bus Driver Instructor Course provide effective instruction to school bus driver trainees. It contains enough material for 20-30 hours of classroom training. The information is organized in 12 instructional units that cover the following topics: introduction to the course; driver's license and special certificate requirements; bus operation, use, laws, and

regulations; vehicle components; general defensive driving techniques; specialized defensive driving techniques; passenger loading and unloading; emergency procedures; passenger management; activity trips; the special needs passenger; and public and community relations. Each unit includes an outline of the lesson plans in it, notes to the instructor, content information, handouts, and pretests and unit test. A final unit of the guide provides additional information for the instructor on teaching the course, such as materials needed to conduct classes, classroom arrangement, lesson planning and teaching techniques, and tests and answer keys. Johannes Vermeer (1632-1675) has been one of the most widely admired European painters since his so-called rediscovery in the second half of the nineteenth century. Until quite recently, the Romantic roots of writing on the Sphinx of Delft have encouraged the image of him as an isolated genius; the artist's private life and religion, his supposed use of a camera obscura, and the fact that his teacher has not been identified have all contributed to an air of mystery. As this new monograph demonstrates, Vermeer's life is actually well documented and his work may be more appropriately understood by placing the painter in the context of the Delft school as a whole and of Delft society. The fact that one local patron

acquired about twenty pictures by the artist (only thirty-six are known today) must have been significant for Vermeers subtleties of meaning and refinements of technique and style. In the end, however, the most historical approach to Vermeer still leaves us with a master whose rare sensibility and extraordinary powers of observation may be described but not explained.
