One of Fuller's most popular works, Operating Manual for Spaceship Earth, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future. The Continuum Concept introduces the idea that in order to achieve optimal physical, mental and emotional development, human beings - especially babies - require the kind of instinctive nurturing as practiced by our ancient relatives. It is a true 'back to basics' approach to parenting. Author Jean Liedloff spent two and-a-half years in the jungle deep in the heart of South America living with indigenous tribes and was astounded at how differently children are raised outside the Western world. She came to the realisation that essential child-rearing techniques such as touch, trust and community have been undermined in modern times, and in this book suggests practical ways to regain our natural well-being, for our children and ourselves.

From the widely acclaimed HOW TO TALK series, discover how to cope with - and deflect - sibling rivalry. Full of humour and compassion, SIBLINGS WITHOUT RIVALRY challenges the idea that constant conflict between siblings is natural and unavoidable. With this book, you'll learn how to: · Avoid comparisons and the perils of equality. · Intervene helpfully and step away at the right time. · Encourage good feeling between your children.

Providing guidance on a broad range of issues for young children and adolescents, Ergonomics for Children: Designing Products and Places for Toddlers to Teens give you a deep understanding of how children develop and how these developmental changes can influence the design of products and places for children. Copiously illustrated with photos and other images, the book helps you quickly find answers to your questions, grasp concepts, and apply them. Its subsections are organized to help you locate and understand the content you need. Edited by experts with contributions from an international panel, the book is both broad in coverage and international in perspective. The contributors review the ways in which children develop physically, perceptually, cognitively, and socially and then use this information to provide practical guidelines for the design of places and products for children.

The iPad does everything...but what if you don't want to do everything?! Sure, it's great that you can log into a private network or set up an iMAP / POP email account--but what if you are retired and just want to know the basics--like how to do a group Facetime with all the grandkids! This book walks you through what you need to know step-by-step--including how navigation works now that the Home button is gone on some of the iPad Pros. It covers only what you need to know--so you don't have to comb through hundreds of pages of tech-speak just to find out how to do a common feature. This book is based on the bestselling book "The Ridiculously Simple Guide to the Next Generation iPad Pro" but includes sections specifically for seniors (including accessibility features that make text easier to see). Are you ready to start enjoying your new iPad Pro? Then let's get started! Note: This book is not endorsed by Apple and should be considered unofficial.

The long-awaited follow-up to the perennially bestselling writers' guide *Story*, from the most sought-after expert in the art of storytelling. Robert McKee's popular writing workshops have earned him an international reputation. The list of alumni with Oscars runs off the page. The cornerstone of his program is his singular book, *Story*, which has defined how we talk about the art of story creation. Now, in *DIALOGUE*, McKee offers the same in-depth analysis for how characters speak on the screen, on the stage, and on the page in believable and engaging ways. From *Macbeth* to *Breaking Bad*, McKee deconstructs key scenes to illustrate the strategies and techniques of dialogue. *DIALOGUE* applies a framework of incisive thinking to instruct the prospective writer on how to craft artful, impactful speech. Famous McKee alumni include Peter Jackson, Jane Campion, Geoffrey Rush, Paul Haggis, the writing team for Pixar, and many others.
