This book discusses the opportunities and conditions that digital technology provides to extend, innovate and differentiate the services offered by consulting companies. It introduces suitable artefacts like web-based consulting platforms, consulting applications, semantic technologies and tools for data mining and collaboration. Furthermore it examines concepts to evaluate the virtualization of consulting processes and showcases how solutions can be developed to blend traditional and digital consulting models. Presenting state-of-the-art research and providing a comprehensive overview of the methods and techniques needed for digital transformation in the consulting industry, the book serves as both a guide and a roadmap for innovative consulting companies.

Why do some innovation projects succeed where others fail? The book reveals the business implications of Jobs Theory and explains how to put Jobs Theory into practice using Outcome-Driven Innovation.

Innovation principles to bring about meaningful and sustainablegrowth in your organization Using a list of more than 2,000 successful innovations,including Cirque du Soleil, early IBM mainframes, the Ford Model-T,and many more, the authors applied a proprietary algorithm anddetermined ten meaningful groupingsThe Ten Types ofInnovationthat provided insight into innovation. The TenTypes of Innovation explores these insights to diagnosepatterns of innovation within industries, to identify innovationopportunities, and to evaluate how firms are performing againstcompetitors. The framework has proven to be one of the mostenduring and useful ways to start thinking abouttransformation. Details how you can use these innovation principles to bringabout meaningfuland sustainable!growth within yourorganization Author Larry Keeley is a world renowned speaker, innovationconsultant, and president and co-founder of Doblin, the innovationpractice of Monitor Group; BusinessWeek named Keeley one of sevenInnovation Gurus who are changing the field The Ten Types of Innovation concept has influenced thousands ofexecutives and companies around the world since its discovery in1998. Praise for "Wired to Care" ""Wired to Care" will convince you that businesses succeed with their hearts as much as their heads. Dev Patnaik has given us just what we need for the lean years ahead."MALCOLM GLADWELL, author of "Outliers, Blink, " and " The Tipping Point" ""Wired to Care" describes how to recover the basic human abilities of empathy that may be buried by your day-to-day business routines. Dev Patnaik shows how you can create a more empathic--and much more successful--business."CHIP HEATH, author of " Made to Stick" "Dev Patnaik's "Wired to Care" maps a path to innovation fueled by 'seeing the world with new eyes.' On numerous occasions, Dev and his colleagues at Jump helped us break through to those most critical insights."BETH COMSTOCK, Chief Marketing Officer, GE ""Wired to Care" offers a roadmap to success paved with empathy. The bottom line is better profits, better products, and happier employees. There is a better day for business (thankfully) when companies are wired to care."ROBYN WATERS, former VP of Trend, Target Stores, and author of "The Hummer and the Mini" Blurring the Line Between Inside and Out What's the critical difference between Nike and every other shoe company on the planet? Why do some airline executives continue to insist that air travel is great, when we all know better? What has enabled Zildjian, a family business founded outside Istanbul, to thrive for almost 400 years? In this essential and illuminating book, top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has: empathy, the ability to reach outside of ourselves and connect with other people. When people inside a company develop a shared sense of what's going on in the world, they see new opportunities faster than their competitors. They have the courage to take a risk on something new. And they have the gut-level certitude to stick with an idea that doesn't take off right away. People are "Wired to Care," and many of the world's best organizations are, too. In pursuit of this idea, Patnaik takes readers inside big companies like IBM, Target, and Intel to see widespread empathy in action. But he also goes to farmers' markets and a conference on world religions. He dives deep into the catacombs of the human brain to find the biological sources of empathy. And he spends time on both sides of the political aisle, with James Carville, the Ragin' Cajun, and John McCain, a national hero, to show how empathy can give you the acuity to cut through a morass of contradictory information. "Wired to Care "is a compelling tale of the power that people have to see the world through each other's eyes, told with passion for the possibilities that lie ahead if leaders learn to stop worrying about their own problems and start caring about the world around them. As Patnaik notes, in addition to its considerable economic benefits, increasing empathy for the people you serve can have a personal impact, as well: It just might help you to have a better day at work.

This book presents unique insights and advice on defining and managing the innovation transformation journey. Using novel ideas, examples and best practices, it empowers management executives at all levels to drive cultural, technological and organizational changes toward innovation. Covering modern innovation techniques, tools, programs and strategies, it focuses on the role of the latest technologies (e.g., artificial intelligence to discover, handle and manage ideas), methodologies (including Agile Engineering and Rapid Prototyping) and combinations of these (like hackathons or gamification). At the same time, it highlights the importance of culture and provides suggestions on how to build it. In the era of AI and the unprecedented pace of technology evolution, companies need to become truly innovative in order to survive. The transformation toward an innovation-led company is difficult - it requires a strong leadership and culture, advanced technologies and well-designed programs. The book is based on the author's long-term experience and novel ideas, and reflects two decades of startup, consulting and corporate leadership experience. It is intended for business, technology, and innovation leaders.

This book provides a new perspective on innovation in consultancy firms. Focusing on how consultancy firms can innovate in the modern era, it exposes and discusses key drivers for innovation in the industry. These are broken down into 5 dimensions - or [Poles] - relating to forms of capital (human capital, social capital, and three types of organizational capital) that consultancy firms can use in order to innovate, both for themselves and for their clients. Readers of this book will not only gain insight into the "innovative consultancy" from the perspective of each of these Poles. They will also discover how consultancy firms need to find the right way of connecting these Poles together in order to produce the desired innovation. Readers will learn about the dangers of misaligning the Poles, as well as implications of innovative consultancy for ethics, academic research in the field of consultancy, and for careers. In addition to the academic literature, the book draws from real-world examples, cases and practice insights from various parts of the world. This book will be of great use to those interested in pursuing a career in the consultancy industry, whether they are undergraduate and postgraduate Business & Management students, students not necessarily studying in Business Schools, or others seeking a career move into consultancy. It will also be valuable to seasoned consultants and managers of consultancy firms seeking new ideas on how to develop innovative capabilities in an increasingly competitive industry.
