No computers will be found in this book. If the idea of a computer science book without computers upsets you, please close your eyes until you've finished reading the rest of this page. The truth is that computer science is not really about the computer. It is just a tool to help you see ideas more clearly. You can see the moon and stars without a telescope, smell the flowers without a fluoroscope, have fun without a funoscope, and be silly sans oscilloscope. You can also play with computer science without... you-know-what. Ideas are the real stuff of computer science. This book is about those ideas, and how to find them.

Fifteen seers delivered the same prophecy, without so much as a single minstrel to lighten the mood: an unknown darkness threatens the kingdom. Suddenly, Princess Ann finds herself sent forth alone to save the kingdom. Leaving behind her home, family, and pet turtle Fido, Princess Ann must face goblin attacks, magical curses, arrogant scholars, an unpleasant oracle, and rude Boolean waiters. Along the way she must build a war chest of computational knowledge to survive the coming challenge.

"The Best Practices of Spell Design introduces practical aspects of software development that are often learned through painful experience. Through Marcus and Shelly's quest, the story encourages readers to think about how to write readable, well-tested and maintainable programs."--P. [4] of cover.

In *The Hundreds* Lauren Berlant and Kathleen Stewart speculate on writing, affect, politics, and attention to processes of world-making. The experiment of the one hundred word constraint—each piece is one hundred or multiples of one hundred words long—amplifies the resonance of things that are happening in atmospheres, rhythms of encounter, and scenes that shift the social and conceptual ground. What's an encounter with anything once it's seen as an incitement to composition? What's a concept or a theory if they're no longer seen as a truth effect, but a training in absorption, attention, and framing? *The Hundreds* includes four indexes in which Andrew Causey, Susan Lepselter, Fred Moten, and Stephen Muecke each respond with their own compositional, conceptual, and formal staging of the worlds of

Meet Frank Runtime. Disgraced ex-detective. Hard-boiled private eye. Search expert. When a robbery hits police headquarters, it's up to Frank Runtime and his extensive search skills to catch the culprits.
