# Online Library Lower Secondary Science Matters Volume A Workbook Answers

This book explores teaching and learning in lower secondary classrooms in the three PISA domains science, mathematics and reading. Based on

# Online Library

## Lower

extensive video documentation from science, math and reading classrooms in Norwegian secondary schooling, it analyzes how offered and experienced teaching and learning opportunities in these three subject areas support students' learning. The in-depth investigations of video

# Online Library

## Lower

documentation are combined with analysis of the Norwegian PISA results in order to understand how teaching and learning in science, mathematics and reading can be improved. Recent reviews indicate that instructional practice does make a difference to students learning - and is more important

# Online Library

## Lower

than other factors including students' socioeconomic background, class size, classroom climate, and teachers' experience and formal training.

This book opens the discussion on a European basis about contemporary challenges in teaching and learning in secondary schooling.

# Online Library

## Lower

Norway as a test bed is particularly interesting due to its long tradition with national curricula, and its unitary and non-streamed structure.

Furthermore, ideas of educational progressivism and students' active ways of working (such as individualized teaching, adapted teaching, inquiry based teaching

# Online Library

## Lower

etc.) have for a long time been actively promoted within Norwegian educational policies.

The book draws on analyses that combine expertise in psychometrics and video-based micro genetic classroom studies with expertise in domain-specific instruction (math, science and reading). It feeds the

# Online Library

## Lower

Secondary how issues of communication patterns are dealt with and made productive within different instructional formats, and presents possibilities to compare and analyze instructional formats and discursive practices for students' learning.
