Providing a grounding in the main techniques and underlying concepts involved in the preparation and analysis of accounting statements and their application to various forms of business organization, this title develops ideas progressively and is illustrated through worked examples.

This volume contains the first twenty chapters (the financial accounting chapters) from Accounting Principles, Third Edition by the same authors. As in the full book this version has been designed to make the accounting experience interesting and meaningful. Each chapter opens with real-life scenarios that illustrate how accounting relates to students' lives. Provides insight into business, ethics and international problems as well as challenges accountants face and accounting's role in dealing with these issues. Technology in Action boxes demonstrate how computers continue to revolutionize accounting, how they are used in today's accounting practice as well as an idea of what the future holds. Features scores of demonstration problems, self-study questions and exercises.

In its US edition, Accounting Principles has been a market leading introductory accounting textbook for over 25 years. The Australasian adaptation of this highly regarded textbook

accentuates its relevance to both students and academics alike with its constructive pedagogical structure, application of accounting to a wider business environment, and clear, easy-to-understand writing style. As accounting is the language of business, Principles of Financial Accounting, 3rd Edition will teach students the value of accounting information in business and its integral role in business planning and growth. The third edition thoroughly details the steps in the accounting cycle and the accounting process, from recording business transactions through to preparing financial statements, and the reporting requirements under IFRS. Throughout the chapters real company financial information and extracts from annual reports are used to reinforce how accounting information is presented, and the range of business decisions that can be made from accounting information. The text is ideal for a first course in financial accounting and students studying with this textbook will be equipped with the knowledge and skills required to further their accounting studies.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
