Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people.

Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride,

marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

The second edition of 'The Science of Psychology' brings a truly appreciative view of psychology - as a science and for exploring behavior - to introductory students.

"This book is a breakthrough, a lyrical, powerful, science-based narrative that actually shows us how to get better (much better) at the things we care about."—Seth Godin, author of *Linchpin* "Anyone who wants to get better at anything should read [Peak].

Rest assured that the book is not mere theory.

Ericsson's research focuses on the real world, and he explains in detail, with examples, how all of us can apply the principles of great performance in our work or in any other part of our lives."—Fortune Anders

Ericsson has made a career studying chess champions, violin virtuosos, star athletes, and memory mavens. *Peak* distills three decades of myth-shattering research into a powerful learning strategy that is fundamentally different from the way people traditionally think about acquiring new abilities.

Whether you want to stand out at work, improve your athletic or musical performance, or help your child achieve academic goals, Ericsson's revolutionary methods will show you how to improve at almost any skill that matters to you. "The science of excellence can be divided into two eras: before Ericsson and after Ericsson. His groundbreaking work, captured in this brilliantly useful book, provides us with a blueprint for achieving the most important and life-

changing work possible: to become a little bit better each day.”—Dan Coyle, author of *The Talent Code*  
“Ericsson’s research has revolutionized how we think about human achievement. If everyone would take the lessons of this book to heart, it could truly change the world.”—Joshua Foer, author of *Moonwalking with Einstein*

Updated to reflect the latest data in the field, the second edition of *Majoring in Psychology: Achieving Your Educational and Career Goals* remains the most comprehensive and accessible text for psychology majors available today. The new edition incorporates the most up-to-date research, as well as recent changes to the GRE Reveals the benefits of pursuing a psychology degree and shows students how to prepare for a career or to continue with graduate study in the field Features a wide range of supplemental exercises and materials plus topical contributions written by national and international figures in their respective psychology subfields Online support materials for instructors include Powerpoint slides and test banks to support each chapter

The most contemporary and relevant introduction to the field, *Cultural Psychology*, third edition, is unmatched in both its presentation of current, global experimental research and its demonstration of how cultural psychology is relevant to students' lives, their society and the world around them.
