obsessed. Stars Don't Stand Still in the Sky assembles scholars, music writers, industry workers, and musicians, who offer a range of opinions and experience of the nature of fame. The collection focuses on commerce, the crowd, performance and image, history and memory, and romance. Contributors discuss black women icons, love-songs, the legacy of the blues, the image of the tortured rock star, MTV, the politics of the Rock and Roll Hall of Fame, the joy of line-dancing, and more. The contributors are James Bernard, Anthony DeCurtis, Katherine Dieckmann, Chuck Eddy, Paul Gilroy, Daniel Glass, Lawrence Grossberg, Jessica Hagedorn, Kathleen Hanna, James Hannaham, Dave Hickey, Jon Langford, Greil Marcus, Angela McRobbie, Paul D. Miller (a.k.a. DJ Spooky), Barbara O'Dair, Ann Powers, Toshi Reagon, Simon Reynolds, Robert Santelli, Jon Savage, Danyel Smith, Arlene Stein, Deena Weinstein, and Ellen Willis.

This is a book of many voyages. There is the meandering trail that leads to the right boat for crossing an ocean. There is the preparation stalled in a sweltering American boatyard while arguments about equipment and finance combine with the narrowing of the hurricane window. There is the crossing itself which starts with the wrong weather, broken boat parts, torn sails, serious leaks and a very seasick crew as Scarlet gets blown off course in unkind seas. Male and female monologues form the internal voyages. The skipper's thoughts range from the challenges of fitting a wind vane to almost losing an arm in a tangled genoa to the navigational system of the Puluwat Islanders. His wife describes diminishing supplies, the damp, bruises, blue eggs, jellyfish and her anxiety about the deteriorating health of her son who, suffering from ME, should not have been persuaded to go with them. External and internal journeys criss-cross as

How hormonal signals in one small structure of the brain—the hypothalamus—govern our physiology and behavior. As human beings, we prefer to think of ourselves as reasonable. But how much of what we do is really governed by reason? In this book, Gareth Leng considers the extent to which one small structure of the neuroendocrine brain—the hypothalamus—influences what we do, how we love, and who we are. The hypothalamus contains a large variety of neurons. These communicate not only through neurotransmitters, but also through peptide signals that act as hormones within the brain. While neurotransmitter signals tend to be ephemeral and confined by anatomical connectivity, the hormone signals that hypothalamic neurons generate are potent, wide-reaching, and long-lasting. Leng explores the evolutionary origins of these remarkable neurons, and where the receptors for their hormone signals are found in the brain. By asking how the hypothalamic neurons and their receptors are regulated, he explores how the hypothalamus links our passions with our reason. The Heart of the Brain shows in an accessible way how this very small structure is very much at the heart of what makes us human.

As James T. Kirk prepares to retire from a long and illustrious Starfleet career, events in a distant part of the Federation draw him back to a part of the galaxy he had last visited as a young man -- a mysterious world called Faramond whose name takes Kirk on a journey back to his youth. At sixteen, Kirk is troubled, estranged from his father, and has a bleak future. However, a trip into space with Kirk's father George and Starfleet legend Captain Robert April changes James Kirk's life forever, when a simple voyage becomes a deadly trap. Soon Kirk and his father find themselves fighting for their lives against a vicious and powerful enemy. Before the voyage ends, father and son will face life and death together, and James T. Kirk will get a glimpse of the future and his own Best Destiny...

Did you remember your goggles? There used to be a time when pretty much every high school offered Shop class, where students learned to use a circular saw or rewire a busted lamp- all while discovering the satisfaction of being self-reliant and doing it yourself. Shop Class for Everyone now offers anyone who might have missed this vital class a crash course in these practical life skills. Packed with illustrated step by step instructions, plus relevant charts, lists, and handy graphics, here ' s how to plaster a wall, build a bookcase from scratch, unclog a drain, and change a flat tire (on your car or bike). It ' s all made clear in plain, nontechnical language for any level of DIYer, and it comes with a guarantee: No matter how simple the task, doing it with your own two hands provides a feeling of accomplishment that no app or device will ever give you.

terrifying power from exterminating all life in the Milky Way Galaxy.

Born into a family of migrant workers, toiling in the fields by the age of six, Jose M. Hernández dreamed of traveling through the night skies on a rocket ship. REACHING FOR THE STARS is the inspiring story of how he realized that dream, becoming the first Mexican-American astronaut. Hernández didn't speak English till he was 12, and his peers often joined gangs, or skipped school. And yet, by his twenties he was part of an elite team helping develop technology for the early detection of breast cancer. He was turned down by NASA eleven times on his long journey to donning that famous orange space suit. Hernández message of hard work, education, perseverance, of "reaching for the stars," makes this a classic American autobiography.
