The Oxford Handbook of Strategic Sales and Sales Management is an unrivalled overview by leading academics in the field of sales and marketing management. Sales theory is experiencing a renaissance driven by a number of factors, including building profitable relationships, creating/delivering brand value, strategic customer management, sales and marketing relationships, global selling, and the change from transactional to customer relationship marketing. Escalating sales and selling costs require organisations to be more focused on results and highlight the shifting of resources from marketing to sales. Further the growth in customer power now requires a strategic sales response, and not just a tactical one. The positioning of sales within the organisation, the sales function and sales management are all discussed. The Handbook is not a general sales management text about managing a sales force, but will fill a gap in the existing literature through consolidating the current academic research in the sales area. The Handbook is structured around four key topics. The first section explores the strategic positioning of the sales function within the modern organisation. The second considers sales management and recent developments. The third section examines the sales relationship with the customer and highlights how sales is responding to the modern environment. Finally, the fourth section reviews the internal composition of sales within the organisation. The Handbook will provide a comprehensive introduction to the latest research in sales management, and is suitable for academics, professionals, and those taking professional qualifications in sales and marketing.

Strategic Marketing Management Cases is a versatile collection of approximately 45 cases. This casebook has a decision-making focus and addresses the challenges facing marketing managers today. It is organized to reflect the priorities of a marketing manager: market orientation, growth strategies and target market strategies.

This fully revised 3rd edition of Strategic Marketing: Decision-Making and Planning sets a framework for marketing decision-making as a part of a holistic approach to an organisation's strategic management. It integrates expanded theoretical coverage with a step-by-step guide to each stage of the strategy development and management processes. The latest theories on how marketing strategy is conceptualised and practiced is examined alongside a framework to facilitate the practical application of relevant concepts, tools and techniques. A series of 10 dynamic interactive modules exploring each stage of the strategic marketing process are included and new features such as Strategy in Practice boxes and end-of-chapter Strategy in Action activities further highlight the connection between theory and application. Continuing to bridge the gap between theory learnt and the practice of writing a marketing plan or report, Strategic Marketing: Decision-Making and Planning 3e is an invaluable resource for students and practitioners alike.

The text is a European adaptation of our current US book: Strategic Market Management, 9th Edition by David Aaker. This new edition is a mainstream text suitable for all business students studying strategy and marketing courses. Strategic Market Management: Global Perspectives is motivated by the strategic challenges created by the dynamic nature of markets. The premise is that all traditional strategic management tools either do not apply or need to be adapted to a more dynamic context. The unique aspects of the book are its inclusion of: A business strategy definition that includes product/market scope, value proposition, and assets and competences. A structured strategic analysis including a detailed customer, competitor, market, and environmental analysis leading to an understanding of market dynamics that is supported by a summary flow diagram, a set of agendas to help start the process, and a set of planning forms. Concepts of strategic commitment, opportunism, and adaptability and how they can and should be blended together. Bases of a value proposition and strong brands. A strategy without a compelling value proposition will not be market driven or successful. Brand assets that will support a business strategy need to be developed. Creating synergetic marketing with silo organisations defined by products or countries. All organisations have multiple products and markets and creating cooperation and communication instead of competition and isolation is becoming an imperative. A global perspective is an essential aspect of this new edition. This reflects the lived experience of the student reader but also their likely professional challenges. This is achieved by the extensive use of new examples and vignettes.
