The book examines the status of public service in developing countries, in the sectors of health, infrastructure, labour and marginalized populations, rural economy and public administration. The last decade has witnessed significant government focus on service delivery in developing nations like South Africa, Philippines, India and Malaysia. At the forefront of this movement has been the public sector reforms significantly driven by two broad factors: public sector inefficiencies and liberal economic ideology. This move towards efficient public service delivery in developing nations (versus developed nations) has required a significant shift in institutional thinking and institutional capacity for the governments. It is therefore no surprise that while economic liberalization has been relatively easy to implement, governance reforms

towards public service delivery has been significantly more challenging. In this background, the chapters of the book, with sector themes, examine the three basic foundations of public policy—courses of action, regulatory measures and issues, and funding structures and priorities—in public service delivery. The book is a multi country, multi sector, perspective since it includes studies from Russian Federation, India, Ethiopia, Pakistan, Fiji, South Africa, Columbia, Philippines, Macedonia and India. This perspective lends itself to the investigation for a comprehensive overall development model.

What happens when prominent brands: Send faulty products into the market? Defy governmental regulations? Back the wrong marketing message? Have management spats in public? Or simply fail to anticipate a major trend? Over the years, prominent brands in India across product categories, both home-grown and multinational, have tackled crises ? some unexpected and some self-inflicted, but each a defining factor in shaping a company's future. In a first-of-its-kind narrative, Rebuild brings together the stories behind some of India's biggest businesses that dealt with potential disaster and emerged on the other side ? either victorious or wiser. Digging deep into the crisis management strategies adopted by companies such as Coca-Cola, Unilever, Kingfisher, Tata Sons, Indian Premier League, Facebook, Uber, Nokia, Nestlé Maggi Noodles and several more, it analyses the steps that different organizations have taken to minimize damage to their brand, and describes how (if at all) they recovered. Featuring interviews with top management executives as well as expert brand-watchers, Rebuild closely examines the circumstances that cause brands to falter ? faulty products, leadership changes, disastrous sales cycles and competition activity, among others ? and provides invaluable insights that may serve as cautionary tales for organizations, both small and large.

Topics are broken down to short, clear chapters, that are all structured in the same way, so students can build

their understanding with ease - Covers each syllabus area in the detail you need, with exercises that have enough depth and variety to give full class and homework coverage - Brings the business world into the classroom with real examples used extensively throughout the text, in extra cases and in end-of-chapter exercises - Features to help reinforce student understanding - in every chapter there's Real Business, an Evaluation and Logic Chain, but also the brand new '5 Whys and a How' which will help students tackle exam questions

This textbook covers the fundamentals of organizational development and change (ODC) theory while offering a comprehensive, structured, and systematic approach to guide change management strategies at the organization level. It provides an in-depth understanding of and the tools necessary for designing, diagnosing, implementing and evaluating organizational change interventions. Students will be exposed to case studies in ODC from selected international and Caribbean/Latin American organizations, demonstrating ODC in practice across a broad geographical context. This textbook, the first to offer a macro-level perspective of ODC, provides students with the tools needed to be successful in implementing change into today's organizations.

The era of nineties has created a new breed of entrepreneurs whose quest for finance is unending. The lending institutions, on the other hand, have become choosy due to, among other reasons, mounting Non-performing Assets (NPAs). All this has led to increased pressure on the availability of finance to the entrepreneurs. In this setting, careful consideration of Project Appraisal and Financing holds the key to survival. Designed in this context, the book begins with explaining the project ' s fundamentals—features, identification, and project life cycle. It goes on to explain and analyze project formulation, appraisal of promoters and management, market appraisal, technical appraisal, financial appraisal, project report, institutional risk assessment and financing decision. The book also focuses on the concepts of project management, overruns, post-completion performance evaluation and contemporary issues like infrastructural financing, and environmental impact assessment. All through the book, the emphasis is on critical analysis and decision-making. Primarily intended for the students of MBA/PGDM/PGDBM and other allied courses such as MFC and MBE, the book will also be of immense value to the students of CA, CWA, CS, CFA, CPA and CAIIB. Besides, it will be equally beneficial for the executive development and in-company training programmes on project appraisal and financing. Project finance executives in consulting firms and lending institutions and banks will also be benefited from the book due to its practical orientation.

KEY FEATURES

- Highlights the text from practitioner ' s perspective.
- Written in a lecture mode and conversational style; classroom simulative.
- Large number of illustrations, exercises and case studies.
