THE GREAT IDEAS If there is some end of the things we do...will not knowledge of it, have a great influence on life? Shall we not, like archers who have a mark to aim at, be more likely to hit upon what we should? If so, we must try, in outline at least, to determine what it is.

Plato's Symposium contains ideas on love held by various philosophers and other Athenians. It entertains many points of view, including the idea that people were originally doubled -- some with the same gender and others with the opposite, and that, once cut, they spend their lives looking for their other part. This idea "explains" sexual ...

Philosophy is a discipline committed to helping us live wiser and less sorrowful lives. This book artfully draws together 40 of the greatest and most useful ideas found in philosophy, taking us on a journey around key concepts from both Eastern and Western cultures. We are invited to sample the distinctive wisdom of Eastern philosophy via tea drinking ceremonies, walks in bamboo forests, contemplations of rivers and ritualised flower arranging sessions. From Western culture we seek the teachings of some of the greatest minds throughout history including Machiavellianism and Stoicism. This essential guide to philosophy reminds us of the wit, humanity and relevance of a number of great philosophers including Nietzsche, Heidegger, Confucius, Lao Tzu and Buddha. Essential thoughts about love, work, anxiety, self-knowledge and happiness are examined, highlighted and inspiringly presented here so they can work their consoling effect where it is most needed: in our daily lives.

A brilliant and concise account of the lives and ideas of the great philosophers—Plato, Aristotle, Bacon, Spinoza, Voltaire, Kant, Schopenhauer, Spencer, Nietzsche, Bergson, Croce, Russell, Santayana, James, and Dewey—The Story of Philosophy is one of the great books of our time. Few write for the non-specialist as well as Will Durant, and this book is a splendid example of his eminently readable scholarship. Durant's insight and wit never cease to dazzle; The Story of Philosophy is a key book for any reader who wishes to survey the history and development of philosophical ideas in the Western world.

Two simple yet tremendously powerful ideas that shaped virtually every aspect of civilization This book is a breathtaking examination of the two greatest ideas in human history. The first is the idea that the human mind can grasp the universe. The second is the idea that the human mind can grasp itself. Acclaimed philosopher Linda Zagzebski shows how the first unleashed a cultural awakening that swept across the world in the first millennium BCE, giving birth to philosophy, mathematics, science, and virtually all the major world religions. It dominated until the Renaissance, when the discovery of subjectivity profoundly transformed the arts and sciences. This second great idea governed our perception of reality up until the dawn of the twenty-first century. Zagzebski explores how the interplay of the two ideas led to conflicts that have left us ambivalent about the relationship between the mind and the universe, and have given rise to a host of moral and political rifts over the deepest questions human beings face. Should we organize civil society around the ideal of living in harmony with the world or that of individual autonomy? Zagzebski explains how the two greatest ideas continue to divide us today over issues such as abortion, the environment, free speech, and racial and gender identity. This panoramic book reveals what is missing in our conception of ourselves and the world, and imagines a not-too-distant future when a third great idea, the idea that human minds can grasp each other, will help us gain an idea of the whole of reality.

Have you ever lain awake at night worried about how we can be sure of the reality of the external world? Perhaps we are in fact disembodied brains, floating in vats at the whim of some deranged puppetmaster. If so, you are not alone--and what's more, you are in exalted company--for this question and other ones like it have been the stuff of philosophical rumination from Plato to Popper. In a series of accessible and engagingly written essays, 50 Philosophy Ideas You Really Need to Know introduces and explains the problems of knowledge, consciousness, identity, ethics, belief, justice, and aesthetics that have engaged the attention of thinkers from the era of the ancient Greeks to the present day.

Introduces twenty-five of history's leading figures in philosophy, including Buddha, Aristotle, René Descartes, and Friedrich Nietzsche, and how their philosophical ideas continue to matter in today's world.
