When a disturbed young Russian man came to Freud for treatment, the analysis of his childhood neuroses—most notably a dream about wolves outside his bedroom window—eventually revealed a deep-seated trauma. It took more than four years to treat him, and "The Wolfman" became one of Freud's most famous cases. This volume also contains the case histories of a boy's fear of horses and the Ratman's violent fear of rats, as well as the essay "Some Character Types," in which Freud draws on the work of Shakespeare, Ibsen, and Nietzsche to demonstrate different kinds of resistance to therapy. Above all, the case histories show us Freud at work, in his own words.

This volume contains a key statement about evidence for the unconscious, and how it works, as well as major essays on all the fundamentals of mental functioning. Freud explores how we are torn between the pleasure principle and the reality principle, how we often find ways both to express and to deny what we most fear, and why certain men need fetishes for their sexual satisfaction. His study of our most basic drives, and how they are transformed, brilliantly illuminates
