Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Official organ of the book trade of the United Kingdom.

William Edward Burghardt Du Bois was a black civil rights activist, leader, Pan-Africanist, sociologist, educator, historian, writer, editor, poet, and scholar. He became a naturalized citizen of Ghana in 1963 at the age of 95. "The time has not yet come for a complete history of the Negro peoples. Archaeological research in Africa has just begun, and many sources of information in Arabian, Portuguese, and other tongues are not fully at our command; and, too, it must frankly be confessed, racial prejudice against darker peoples is still too strong in so-called civilized centers for judicial appraisalment of the peoples of Africa. Much intensive monographic work in history and science is needed to clear mooted points and quiet the controversialist who mistakes present personal desire for scientific proof. Nevertheless, I have not been able to withstand the temptation to essay such short general statement of the main known facts and their fair interpretation as shall enable the general reader to know as men a sixth or more of the human race. Manifestly so short a story must be mainly conclusions and generalizations with but meager indication of authorities and underlying arguments." - W. E. B. Du Bois

"A privateer is an armed vessel (or its commander) which, in time of war, though owners and officers and crew are private persons, has a commission from a belligerent government to commit acts of warfare on vessels of its enemy"--Pref.

This is the full unabridged edition in a facsimile reprint, 436 pages. The object of the present book is in the tracing the course secret societies. I shall rely as far as possible on the documents and admissions of their members, on which point I have been able to collect a great deal of fresh data entirely corroborating my former thesis. It should be understood that I do not propose to give a complete history of secret societies, but only of secret societies in their relation to the revolutionary movement. I shall therefore not attempt to describe the theories of occultism nor to enquire into the secrets of Freemasonry, but simply to relate the history of these systems in order to show the manner in which they have been utilized for a subversive purpose. If I then fail to convince the incredulous that secret forces of revolution exist, it will not be for want of evidence. About the AuthorNesta Helen Webster (24 August 1876 - 16 May 1960) was a controversial historian, occultist, and author who revived conspiracy theories about the Illuminati. She argued that the secret society's members were occultists, plotting communist world domination, using the idea of a Jewish cabal, the Masons and Jesuits as a smokescreen. According to her, their international subversion included the French Revolution, 1848 Revolution, the First World War, the Bolshevik Revolution of 1917. In 1920, Webster was one of the contributing authors who wrote the The Jewish Peril, a series of articles in the London Morning Post, centered on the Protocols of the Elders of Zion. These articles were subsequently compiled and published in the same year, in book form under the title of the The Cause of World Unrest. She was cited respectfully by Winston Churchill, "This movement among the Jews ... as Mrs. Webster, has so ably shown, [played] a definitely recognizable part in the tragedy of the French Revolution" Webster claimed that the authenticity of the Protocols of the Elders of Zion was an open question. Her position on that, in 1924, "Contrary to the assertions of certain writers, I never affirmed my belief in the authenticity of the Protocols, but have always treated it as an entirely open question." She also believed she was a countess in a previous life, who was guillotined by French revolutionaries. At one time she was a member of the British Union of Fascists.

A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.
