“The best explanation that I have seen of corrosion on boats.”—Nigel Calder, author of *Boatowner’s Mechanical and Electrical Manual* “A powerful weapon in the war against metal deterioration.”—*Cruising World* Corrosion is a constant, often expensive, and sometimes dangerous problem for boaters. Moisture, salt, electrical currents, and chemicals create a potent combination that can attack the metallic (and sometimes nonmetallic) parts of your boat. Everett Collier, an expert in marine technology, details all the types of corrosion—including simple galvanic, electrochemical, and electrolytic—and explains how to identify, combat, and prevent them. The most comprehensive book on this subject, *The Boatowner's Guide to Corrosion* shows you how to: Prevent corrosion with proper grounding, cathodic protection,

Repair, the only book that focuses on do-it-yourself maintenance and repair of small powerboats.
