New Private Law Theory opens a new pathway to private law theory through a pluralistic approach. Such a theory needs a broad and stable foundation, which the authors have built here through a canon of nearly seventy texts of reference. This book brings these different texts from different disciplines into conversation with each other, grouping them around central questions of private law and at the same time integrating them with the legal doctrinal analysis of example cases. This book will be accessible to both experienced and early career scholars working on private law.

An emphasis on microeconomic foundations better integrates the study of macroeconomics with approaches learned in microeconomics and field courses in economics. By following an approach to macroeconomics that is consistent with current macroeconomic research, students become better prepared for advanced study in economics. The 6th Edition captures the latest developments in macroeconomic thinking, applied to recent economic events and developments in macroeconomic policy. With the financial crisis receding, new challenges that macroeconomists and policymakers currently need to address are covered in the text.

The uneasy balance between these worlds is shattered when Starr witnesses the fatal shooting of her childhood best friend Khalil at the hands of a police officer. Khalil was unarmed. Soon afterward, his death is a national headline. Some are calling him a thug, maybe even a drug dealer and a gangbanger. Protesters are taking to the streets in Khalil's name. Some cops and the local drug lord try to intimidate Starr and her family. What everyone wants to know is: what really went down that night? And the only person alive who can answer that is Starr. But what Starr does—or does not—say could upend her community. It could also endanger her life. Want more of Garden Heights? Framework agreements have arisen in response to the well documented and high costs of public procurement procedures. The agreements have significant potential to improve procedural efficiency in public procurement, but are complex to operate. Inadequate preparation and implementation can also frustrate their potential both to tackle waste, abuse and corruption and to enhance value for money. In this enlightening book, Gian Luigi Albano and Caroline Nicholas look at the key decisions required for designing and using framework agreements and address both legal and economic issues to give the reader a clear understanding of the planning, variables and flexibility needed for efficient implementation. This book will be of interest to policy makers, lawyers and public procurement practitioners who want to deepen their understanding of the legal and economic issues surrounding framework agreements.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This collection of papers is edited by renowned business thinker Oliver Williamson, who is currently Transamerica Professor of Corporate Strategy at the School of Business Administration at Berkeley. The fiftieth anniversary of the publication of Chester I. Barnard's remarkable and still influential book, *The Functions of the Executive*, was celebrated with a seminar series at the University of California, Berkeley in the Spring of 1988. Eight of those lectures are published here. The contributors include organization specialists and sociologists (Barbara Levitt and James March; W. Richard Scott; Glenn Carroll; Jeffrey Pfeffer), an anthropologist, a political scientist, and two economists (Mary Douglas; Terry Moe; Oliver Hart; Oliver Williamson). An important contribution to organization theory, this volume reports on recent progress in this field, and projects a productive research future.
